

# Aviation Safety Action Program

The **ASAP** is a proactive, nonpunitive program managed by the ACSF as an independent facilitator.

## Voluntary Reporting without Retribution

The ACSF brings you all the benefits of the FAA's voluntary Aviation Safety Action Program (ASAP) at a lower cost.

The easy, open, self-reporting initiative offers third-party facilitation, tracking and corrective action recommendations so you can enhance and improve your overall safety culture.

Use ASAP as a stand-alone safety program or as a key component of your safety management system (SMS). Either way, you'll reduce risk exposure and improve operational efficiency and effectiveness—all of which are good for safety *and* your bottom line.

## Who Should Use ASAP?

- Part 23, 91, 125, 133, 135, 137, 141 and 145 operations
- Pilots, mechanics, dispatchers, schedulers and ground personnel

## BENEFITS:

- Low cost includes a discount for members
- Mentoring and management by the ACSF
- Potentially eliminates deviations from FAA regulations
- Voluntary, cooperative, nonpunitive approach to reporting safety-of-flight concerns
- Fosters a positive, proactive safety culture
- Provides valuable safety information and insight to all participants
