

ACSF Member Assistance Program

MAP is a consultative coaching program and roadmap to ensure your Pathway to Safety.

Are you on the right path?

ACSF's Member Assistance Program (MAP) is designed to provide you (ACSF members) assistance to determine your Pathway to Safety and keep it moving in the right direction.

The "Pathway to Safety" is a roadmap recommended by the Air Charter Safety Foundation. We recognize that everyone's path should and will be unique.

Our pathway begins with facilitating and empowering a "just culture" within your organization. Then it leads you through the implementation of specific programs that include a Safety Management System (SMS), Aviation Safety Action Program (ASAP) and Flight Data Monitoring (FDM).

Find out where you are on the Pathway to Safety, and get the right tools and roadmap to reach your end goals. Plus, be held accountable along your journey by a MAP Safety Coach.

YOUR SAFETY COACH WILL:

- Meet virtually with your safety leader(s) to evaluate how far along your organization is on the Pathway to Safety.
- Customize a Pathway project plan with deliverables and dates so your team can take action.
- Set up your Pathway project plan in the ACSF's MAP Tool and train your team to use the Tool effectively.
- Hold your team accountable to achieve the plan.
- Guide your team on how best to implement the plan.
- Answer safety-related questions as they arise.
- Monitor your progress and ensure you stay on the correct path.
